The Kish grid or Kish selection grid is a method for selecting members within a household to be interviewed. It uses a pre-assigned table of random numbers to find the person to be interviewed. It was developed by statistician Leslie Kish in 1949.. It is a technique widely used in survey research. However, in telephone surveys, the next-birthday method is sometimes preferred to the Kish grid.

Ethics is a key component of good governance (Perry et al. 2014) and has significant potential to affect public trust in all forms of government (Joyce 2014). Previous research has identified a number of factors that can shape standards of conduct within an organization, among which the role of leadership has attracted significant attention (Grojean et al. 2004; Steinbauer et al. 2014).
