On the criteria to be used in decomposing systems into modules David L Parnas, 1971. Welcome back to a new term of The Morning Paper! I thought Iâ€™d kick things off by revisiting a few of my favourite papers from when I very first started this exercise just over two years ago.

### **On the criteria to be used in decomposing systems into**

Agree that microservices architecture should be used only for certain cases of applications. Precisely, I want to highlight that this guide presented on this blog post is NOT about microservices but about lifting and shifting existing .NET Framework apps (that is ASP.NET MVC, Web Forms or WCF services), without re-architecting.

We can next transform the notebook into a web app that retains our layout and can be deployed outside our notebook authoring environment. One option allows us to download a zip file containing the frontend assets for our dashboard, a Dockerfile for building it into a container, and a manifest for pushing it to Cloud Foundry.
