A paradigm shift, a concept identified by the American physicist and philosopher Thomas Kuhn, is a fundamental change in the basic concepts and experimental practices of a scientific discipline. Kuhn contrasts paradigm shifts, which characterize a scientific revolution, to the activity of normal science, which he describes as scientific work done within a prevailing framework (or paradigm).

We view Donald Trump's ascendancy to the Presidency of the U.S. as confirmation of a political and economic paradigm shift that started with Brexit but is likely to continue for the foreseeable future, including elections across Europe in 2017. Consistent with this view, we believe that there are four major potentially secular changes that all investment professionals must consider: fiscal ...

This report describes a paradigm shift in road safety policy, being led by a handful of countries, according to the principles of a Safe System. A Safe System is based on the premise that road crashes are both predictable and preventable, and that it is possible to move towards zero road deaths and serious injuries. This, however, requires a fundamental rethink of the governance and ...
