Professional Linux Kernel Architecture - KU ITTC

The fact that Linux is a monolithic kernel rather than a microkernel was the topic of a debate between Andrew S. Tanenbaum, the creator of MINIX, and Linus Torvalds. The debate, started in 1992 on the Usenet discussion group comp.os.minix, was about Linux and kernel architecture in general. Tanenbaum argued that microkernels were superior to monolithic kernels and that therefore Linux was ...

Largest Shared Technology Investment. The Linux Foundation supports the creation of sustainable open source ecosystems by providing financial and intellectual resources, infrastructure, services, events, and training.

The Linux Foundation â€“ Supporting Open Source Ecosystems

Advanced Linux Sound Architecture (ALSA) is a software framework and part of the Linux kernel that provides an application programming interface (API) for sound card device drivers.. Some of the goals of the ALSA project at its inception were automatic configuration of sound-card hardware and graceful handling of multiple sound devices in a system.

Advanced Linux Sound Architecture - Wikipedia

The Kernel debugging and Compile the kernel with debug info options are needed here. Another call to make generates a kernel with the modified configuration.. The results of this are basically two files: You will have a vmlinux that contains both the code and the corresponding debug information in the directory of the kernel source code. The architecture subdirectory â€“ this is arch/x86/boot ...

LXC, acronym for Linux Containers, is a lightweight Linux kernel based virtualization solution, which practically runs on top of the Operating System, allowing you to run multiple isolated distributions the same time.. The difference between LXC and KVM virtualization is that LXC doesnâ€™t emulate hardware, but shares the same kernel namespace, similar to chroot applications.
