Lie detection is an assessment of a verbal statement with the goal to reveal a possible intentional deceit. Lie detection may refer to a cognitive process of detecting deception by evaluating message content as well as non-verbal cues. It also may refer to questioning techniques used along with technology that record physiological functions to ascertain truth and falsehood in response.

Overview. Too many people have undetected tuberculosis (TB) for too long; late detection of TB increases their risk of transmitting the disease to others, having poor health outcomes, or that they and their family will

suffer distress and economic hardship.
